Transparency in a Leadership-oriented way of governance.

### Justice

Taking a preventive and reactive approach to threat-hunting (APT)

### Meticulous

Accuracy and attention to detail when it comes to technical and systemic audits

### Legislator

Security Oriented Policies

# | Introducing the logo

## Diyako Secure Bow

Inspired by the following image, the logo depicts a man engaged in archery. To conceptualize the pattern, only the bow and the archer's head were incorporated. An arrow is also used next to the company's name. In fact, in terms of design, this part is meant to demonstrate the security aspect of the logo. The circular shape of the bow is meant to convey the dual meaning of a bow and a shield

Planet Earth and its terrestrial communications represent information technology in the logo's design

In the end, by combining the above elements with the letter "D," which is the first letter of the word "Diyako," the following figure emerges. The single circle in the figure signifies both the bow's head and the concept of information technology within the logo

the logo's coloring is done in a way that distinguishes its components, and transforms the information technology aspect of the logo from a plain black-and-white design into a meaningful and colorful representation

# Secure Business Continuity

# Our Mission

→ **Diyako Secure Bow, as a trusted partner, aims to establish itself as a premier global provider of innovative and tailored cybersecurity solutions, renowned for its excellence and dedication to ensuring secure business continuity through sustainability."**

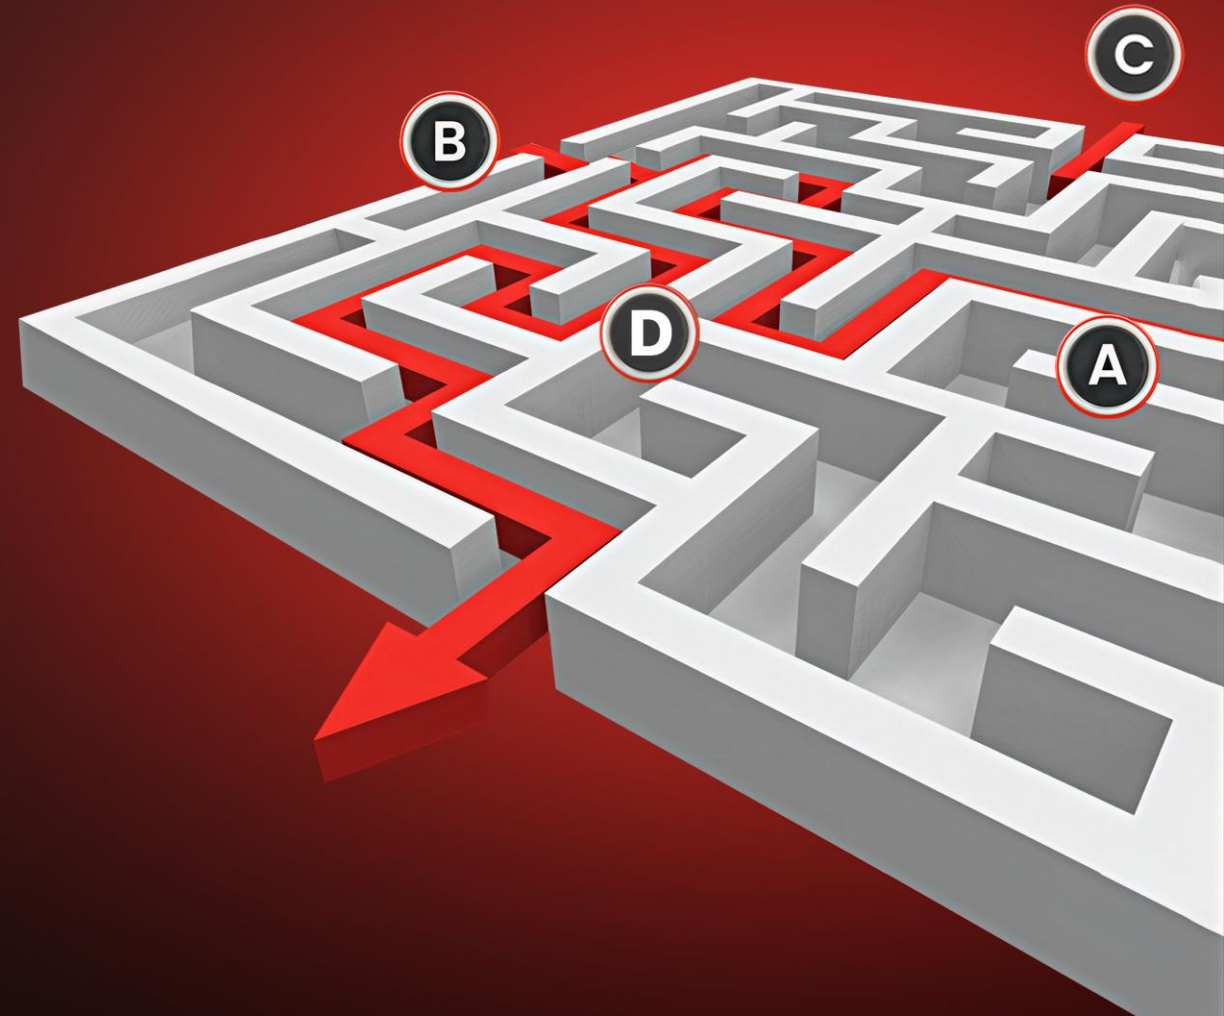

# Vision and goals

- Tailored CyberSecurity solutions to meet client needs
- Bridging the Gap through excellence in cyber security training
- Enhancing CyberSecurity through leadership in research and development
- Building Cyber Resilience by promoting community awareness and education
- Upholding Ethical and Social Responsibility in Cyber Security
